

Partners

The TEMIS project meets the requirements of the SUDOE programme and takes the form of a joint R&D initiative which brings together various European regions and projects in networks and/or enhances the investigation-innovation system, improving the international position of the regions in areas of joint interest to them.

A total of six European partners are involved in this project, representing three countries: France, Spain and Portugal.

The partnership is comprised of the following partners:

- * **MEDES** – Institut de Médecine et de Physiologie Spatiales : project leader, development of smartphone applications and integration of the software platform.
- * **Instituto Tecnológico de Aragón** (ITA) : development of a Kinect application.
- * **Centre Hospitalier Universitaire de Toulouse** (CHUT) : medical specifications, assessments of healthy subjects and patients.
- * **Associação para a Investigação e Desenvolvimento da Faculdade de Medicina Universidade de Lisboa / Faculdade de Medicina** : medical specifications, assessments of healthy subjects and patients.
- * **Fundació CETEMMSA** : development of the smart clothing subsystem.
- * **Confederación Española de Tecnologías de la Información Comunicaciones y Electrónica** (CONETIC) : organisation of the cooperation network and promotion vis-a-vis industrial companies.

The TEMIS team !
