

Products

TEMIS offers a gradual range of products adaptable to various conditions and pathologies :

- * Light ambulatory solutions: SmartPhone solution with related sensors
- * Smart Clothe
- * Ambient solutions: Kinect application

The evaluation of these products will be done with 120 subjects in 2014:

- * Healthy subjects with various profiles
 - * 40 young healthy subjects
 - * 20 young subjects suffering from obesity – limited physical activity
 - * 40 elderly subjects
- * Parkinson patients
 - * 10 patients at the beginning of the disease or for whom the disease is well controlled by the treatment
 - * 10 patients with significant akinesy

--> Evaluation during 7 consecutive days for each subject (visit before and after).
